

RENEGADE[®]

THOMAS  Pro-Series

BREAK AWAY FROM THE PACK

For the ultimate in a tough, heavy-duty professional compressor for your job site, it's time to break away and move to Thomas' new Renegade[®] Pro Series air compressor. Designed for the professional builder, the Renegade[®] gives you many reasons to break away:

- **LONGER LIFE** – With the patented LifeGuard™ dirt deflector that keeps job site dust and grit out of the compressor, the new Renegade[®] will perform year after year after year.

- **HIGH-FLOW PERFORMANCE** – With air delivery of 4.6 CFM @ 100 PSI, the Renegade[®] provides maximum power with multiple tool operation off of one unit.

- **ULTRA QUIET OPERATION** – As the quietest professional 2 HP compressor on the market, the Renegade[®] will make your job site quieter than it ever has been.

- **ELECTRICALLY FRIENDLY** – Renegade's low current draw won't blow standard 15 AMP house circuits, and of course, extension cords can be used whenever and wherever you need one.

So break away from the pack and insist on the Renegade[®] Pro Series compressor for the professional builder.
